SUMMARY

Frontend Developer with hands-on experience in building and optimizing responsive web applications in a production environment, contributing to the development of scalable platforms serving 1K+ active users. Worked on large-scale discussion forum platforms by implementing real-time UI features using WebSocket, API-driven component architectures, and performance-focused rendering techniques, improving page responsiveness and reducing load times by up to 30%. Proficient in HTML, CSS, JavaScript, and React JS, with practical experience in state management, REST API integration, and form handling to build dynamic and user-friendly interfaces. Successfully delivered 2+ end-to-end frontend projects with a strong focus on clean, reusable component design, responsive layouts, and cross-browser compatibility, achieving consistent performance across desktop and mobile devices.

EDUCATION

Narsimha Reddy Engineering college - Hyderabad
B TECH (Electronics of Communication Engineering)

2020 - 2024

EXPERIENCE

Lanciere Technologies Pvt. Ltd.

July 2025 – Present

Associate Engineer

- **Discussion Forum UI Optimization:** Built and optimized frontend components for a large-scale discussion forum, implementing efficient data rendering techniques such as pagination, lazy loading, and virtualized lists to ensure smooth performance under high data volumes and concurrent user activity.
- **API-Driven Frontend Development:** Developed a modern, component-based frontend by consuming RESTful APIs migrated from a legacy Symfony/Twig monolith. Handled API integration, state management, and error/loading states to deliver a responsive and maintainable single-page application.
- **Real-Time UI with WebSocket:** Implemented real-time post and thread update features on the frontend using WebSocket connections. Built live-updating components for new replies, typing indicators, and notifications to enhance user engagement and platform responsiveness.
- **Code Quality & Production Support:** Participated in code reviews, followed clean coding practices, and resolved frontend production issues including cross-browser compatibility bugs, responsive layout fixes, and performance bottlenecks to ensure stable application releases.

PROJECTS

Employee Management Portal

- Developed a role-based Employee Onboarding Portal using React.js to manage employee authentication, onboarding, attendance, timesheets, payroll, and Pay slips.
- Implemented secure login and authorization using JWT tokens with protected routes to restrict access based on user roles such as Admin, HR, Manager, and Employee.
- Designed modular and reusable React components along with custom hooks to improve scalability and maintainability.
- Integrated REST APIs for real-time data handling, form submissions, approvals, and payroll processing.
- Implemented onboarding workflows with document uploads, data persistence, and review mechanisms. Enabled timesheet submission and approval flow to support payroll calculations.
- Focused on improving user experience through role-specific dashboards and efficient navigation. Ensured application security, performance, and future extensibility through clean architecture and structured API integration.

Wattex Energy – Solar Solutions Platform

- Developed a full-scale solar solutions website for Wattex Energy using React JS and Vite, featuring 10+ service-specific pages including Residential, Commercial, On-Grid, Off-Grid, Utility Scale, and Housing Society solar.
- Implemented React Router DOM for seamless multi-page navigation and built an interactive Solar Calculator to help users estimate savings and system requirements.
- Integrated an AI-powered ChatBot using the Claude API to handle real-time user queries and lead generation.
- Designed reusable UI components including Hero Carousel, Parallax Sections, and FAQ Accordions for consistent, engaging UX.
- Applied SEO best practices with Open Graph, Twitter Card meta tags, and geo-targeting for local search visibility.
- Deployed the production build to a live domain with optimized assets, achieving fast load times and cross-browser compatibility.

I Mentora – AI-Powered Training & Assessment Platform

- Built the frontend for a proctored mock test platform with Developer and Non-Developer tracks featuring course-specific question generation across Aptitude, MCQ, and Coding sections.
- Integrated real-time AI proctoring using TensorFlow.js (Blaze Face + COCO-SSD) in Web Workers for face detection, gaze tracking, and auto-termination on violations.
- Implemented full browser lockdown — Fullscreen enforcement, tab-switch detection, history flooding, 18+ blocked shortcuts, and copy-paste prevention.
- Developed session auto-save with crash recovery using Send Beacon for seamless test resume on browser crashes or accidental closures.
- Built a split-pane code editor with multi-language support, syntax highlighting, live test-case execution, and custom input testing.
- Designed results UI with score analytics, AI answer explanations, downloadable PDF reports, and a trainer dashboard for batch-wise performance tracking.

TECHNICAL SKILLS

- **Web Technologies:** HTML, CSS, JavaScript
- **Libraries:** React JS, Material UI (MUI)
- **Frameworks:** Bootstrap
- **Developer Tools:** VS Code, Git, GitHub
- **Databases:** SQL

SOFT SKILLS

- Communication | Leadership | Teamwork | Flexibility | Adaptability

CERTIFICATIONS & ACHIEVEMENTS

- Internship Completion Certificate– React JS, TechInfoTax Pvt. Ltd. (2025)
- Won a first-class certificate in the basketball competition, showcasing exceptional skills and performance. Demonstrated strong abilities in teamwork and athleticism.
